PATENT SUSPENSION STOVES.—As a precaution against cholera, the Board of Health strongly recommend "warmth and ventilation." For the attainment of this all important object, the PATENT PORTABLE VENTILATING SUSPENSION STOVES were expressly invented. Thousands of them have been sold, and tens of thousands are now repairing in the security and comfort which these stoves afford. Seems matted for any situation, from the smallest bed room to the largest halls. Price from 10s. and upwards. In operation daily at GEORGE and JOHN DEANE'S, 46, King William-street, London-bridge. Prospectuses, testimonials, &c., forwarded by postpaid.

TO BUILDERS and CARPENTERS.—Elliptic Stoves, double backs, 2d. per inch. Registers, 6d. 7d., 8d. per inch.

Cottage Ranges, with Ovens and Boilers, 2 ft. 2 in., 6l. 5s.; 2 ft. 4 in. ditto, 3 ft. 6 in., 6l. 15s.

Self-acting Ranges, with Circular Oven and Back Boiler, best Wrought Bars and Bright Fittings,

3 ft., £2 18s. 3 ft. 6, £3 7s. 4 ft., £4 12s.

Best Patent Cut Chasp.

£3. £3. 10s. £3. 15s. £4. £4. 10s.

Henly's Patent Improved, with back Boiler and Wrought Iron Oven:—3 ft. 3 ft. 3 in. 3 ft. 6 in. 3 ft. 9 in. 4 ft.

£3. £3. 15s. £4. 5s. £4. 15s. £5.

Best Register Stoves, at 7d., 8d., and 9d. per inch.

Do. Elliptic do., at 4d., and 5d. do.

Manufacturer of WOLFARTON'S PATENT REGISTER STOVES, a certain cure for SMOKY CHIMNEYS, and effecting a great saving in fuel. To be seen in use daily.

Orders from the Country, accompanied with a remittance or reference, will meet with prompt attention.

WARMING by means of the circulation of WARM AIR.—BURSIDGE and HEALY beg respectfully to inform the public, that they are prepared to undertake the warming of churches, halls, and buildings, with a new apparatus of the most simple and durable construction, which they can warrant to keep in order any length of time, and which is capable of effectually warming buildings of any magnitude in a most economical manner.—BURSIDGE and HEALY, 128, Fleet-street.

HOT-WATER APPARATUS.—The attention of architects, builders, and others is respectfully requested to BENJAMIN FOWLER'S superior method of heating churches and chapels, halls, staircases, conservatories, forcing and greenhouses, manufactories and warehouses, kilns, rooms for drying timber, &c., and every variety of purpose for which artificial heat is required. Within the last twenty years some hundreds of buildings have been heated upon this plan, and the parties for whom they were executed are constantly expressing their satisfaction, also their willingness to vouch for their efficiency. An improved wrought-iron boiler, which requires no brickwork, may be seen in action upon the premises.—BENJAMIN FOWLER, 63, Dorset-street, Fleet-street.

IRON BUILDING and ROOFING WORKS, SOUTHWARK.—JOHN HENDERSON PORTER, Manufacturer of Iron Roofs and Buildings, Patent Wrought Iron Beams, Fire proof Flooring, &c.—Lists of prices and estimates furnished upon application at the office, 2, Adelaide-place, London-bridge, City.

TO BUILDERS AND OTHERS.

RAIN-WATER PIPES, heads, shoes, and elbows, half-round and O G gutters, sash weights, railing bars, sink and stable traps and gratings, air bricks close and open coal plates, scrapers, tile lights, balcony panels, barrow wheels, &c.

GAS and WATER PIPES, bends, branches, Tee pieces, syphons, and lamp columns; also hot-water pipes for heating baths, and hot-houses, and FLANGE PIPES, with all the usual connexions. A large stock of the above CASTINGS at very low prices, at JONES'S, Iron Bridge Wharf, No. 6, Bankside, Southwark.

TO THE OWNERS OF SAW MILLS, PLANTATIONS, and Collieries; to Builders, Millwrights, Engineers, &c.

IMPROVED CIRCULAR SAWS, Upright Saws, for timber and deal frames; Patent Tempered Reciting Plane Irons, saw files, improved engineers' bits; Patent Tempered Machine Knives, and cutters of all descriptions, made on the most scientific and commercial principles, with dispatch, by BLAKE and PARKIN, the Meadow Steel Works, Sheffield.

IRON FOUNDRY, 9, Brick-lane, Old-street St. Luke's.—J. J. JONES having made great additions to his STOCK OF PATTERNS, begs to inform the trade, that he can now supply them with Plain and Ornamental Iron Columns, Girders, Railings, Gates, Iron Fronts, either structural or ornamental, Verandahs, Ornamental Hall-rose Panels, Iron Staircases, Cash Enclosures, Trellis Panelling, Lamp and other Brackets, Cast-lowers, Newel Bars, Water Closet Work, Area Gratings, Pig and other Wheels, Wheel Plates, &c.

BAKER'S OVEN WORK. Forge Backs and Troughs, Rain Water Pipes and Gutters, Sash Weights, Furnace Bars, Stoves, Ranges, &c., always in stock.

IRON FOUNDRY,

148, DRURY-LANE, and CHARLES-STREET, DRURY-LANE

JOSEPH GLOVER,

Solicits the attention of the Trade to his extensive Stock of PATTERNS for CASTINGS of EVERY DESCRIPTION, consisting of those for every purpose, either structural or ornamental.

Wheel Pinions and Steam-Engine Patterns; Range Stove and Hot Plate Metal.

A stock of Rain-Water Pipes, Plain and O G Guttering, Air Bricks, Sash Weights, &c. &c.

A very superior description of Boot Door, particularly suitable for internal work, being perfectly secure, and not unsightly.

ESTIMATES given for IRON ROOFING and every description of Ironwork, complete to specification, and the work executed with every attention to quality and dispatch.

GLOVER'S FOUNDRY,

148, DRURY-LANE, and CHARLES-STREET.

SEYSSEL ASPHALTE COMPANY.

CLARIDGE'S PATENT.

Established March, 1838, for working the Mineral Asphalte Rock of Pyrimont Seyssel, a Bituminous Rock, situate on the Eastern side of the Jura.

Principal Depôts, ROUEN, MARSEILLES, and STANGATE, Surrey side of Westminster-bridge, London.

THE ASPHALTE of SEYSSEL has been extensively used since March, 1838, for the following useful purposes:—

Foot Pavements.
Kitchen Floors particularly where it is essential to keep damp from rising.
Garden Walks and Terraces.
Carriage Drives.
Coach-houses and Stabling.
Dog-kennels.
Farm Floors.
Granaries.
Tan-room Floors.
Malt-house Floors.
Pigeries, &c. &c.
Covering of Railroad and other Arches. The only effectual mode to prevent the percolation of water, which also renders it very appropriate for the Lining of Tanks, Fish-ponds, &c. &c.

The attention of RAILWAY ENGINEERS, ARCHITECTS, and CONTRACTORS is particularly directed to the great advantage to be derived from the application of SEYSSEL ASPHALTE.

The arrangements of the SEYSSEL ASPHALTE COMPANY, CLARIDGE'S PATENT, enable it to execute Works of any extent with the greatest promptitude.

In order to guard against the use of spurious materials, it is important that all applications for Works to be executed, be made direct to the Company; and as a further protection, it is suggested that Engineers, Architects, and Contractors should require a CERTIFICATE from the Company that the proper description of material has been used.

Information may be obtained as to all Works which have been executed by the Company since its establishment in 1838, which will prove that the failure of many Works represented to have been done with the genuine material, has resulted from the substitution of spurious one.

I. FARRELL, Secretary, Seyssel Asphalte Company, Stangate, London.

WARM-AIR STOVES.—J. L. BENHAM and SONS respectfully solicit the attention of Architects, Builders, and the Public in general to their extensive stock of AIR STOVES, suitable for Shops, Halls, School-rooms, &c. Also, a great variety of CHURCH or CHAPEL STOVES.

Churches, Halls, and other buildings WARMED BY HOT WATER from the servant's offices, or by the circulation of WARM AIR ON THE POLONAISE SYSTEM, which is very efficient, and of very moderate cost.

19, WIGMORE-STREET, CAVENDISH-SQUARE, LONDON.

NOTT'S PATENT STOVES.

J. L. BENHAM and SONS beg to recommend these STOVES to Architects, Builders, and Ironmongers, as the best with which they are acquainted for HALLS, SHOPS, WAREHOUSES, &c. They are remarkable for economy of fuel and steadiness of heat, only requiring attendance once in six or eight hours. For CHURCHES and CHAPELS they are particularly adapted, as a cheap, simple, and effectual mode of warming them.

HOT WATER PIPES can be attached for warming distant apartments, conservatories, &c.

References can be given to many Churches and other Buildings where they have been in use from ten to fifteen years.

MANUFACTORY AND WAREHOUSE REMOVED FROM GREAT QUEEN-STREET TO 19, WIGMORE-STREET, CAVENDISH-SQUARE.

CUNDY'S PATENT IMPROVED OPEN FIRE-PLACE, HOT-AIR, VENTILATING STOVE.

TESTIMONIALS AFTER LENGTHENED TRIAL.

From the Rev. Wm. Rogers, B.A., Incumbent of St. Thomas's, Charterhouse.

39, Charterhouse-square, Monday, Feb. 17, 1845.

Dear Sir,—The stoves which you have recently erected in my church have been highly successful, and I have great pleasure in expressing to you the entire satisfaction which they have given to all parties. The church, which was notoriously noted for its coldness and bad ventilation, is now most agreeably warmed and well ventilated. I shall be most happy, on any occasion, to bear testimony to the excellency of your stoves, and I will endeavour, to the best of my power, to make them known, and I will certainly recommend them to my friends.—I remain, Dear Sir, yours faithfully,

WM. ROGERS.

From the Rev. W. Garratt, M.A., Incumbent of St. John's, Fulham.

St. John's, Fulham, 2nd May, 1846.

My Dear Sir,—I have very great pleasure in giving my public testimony to the efficiency of your stove, as combining the double advantage of thoroughly warming and constantly ventilating any large church or building. Your invention appeared to me to be in theory all that could be desired, and I can honestly say that I have not yet discovered the point in which the practice falls short of the theory. The stove in my church is capable of heating 200,000 cubical feet, and though a second stove will be required, the one already erected has fully answered my highest expectations, and realised all that you had given me to expect. If confirmation were needed, for evidence of its efficiency, I might further state, that I had peculiar difficulties to contend with, that various attempts had been made, and that every attempt had been a signal failure, that I was exposed to the charge of boldness in attempting what had baffled others; but that such is the power, the efficiency, and the comfort communicated by your stove, that I know not of a dissentient voice, and have heard only of approval with unanimous consent. I might add that I was first led to making inquiry respecting your stove, having gathered directly, that a disposition had unfavourable towards it was entertained in a certain high quarter, where, on account of ability of discernment, the smallest approach to approval must carry with it great weight.—I remain, dear Sir, yours faithfully, WILLIAM GARRATT.

The following winter the second stove, which is alluded to in the above letter, was put up.]

Letter from the Rev. Matthew O'Brien (Professor of Natural Philosophy and Astronomy), M.A., F.R.S., King's College.

Upper Norwood, 23rd June, 1846.

I beg to certify that one of Mr. Cundy's patent stoves was put up in my lecture-room at King's College, last year, in place of a common stove of Arnott's construction. I believed I have no hesitation in saying, from actual experience, that Mr. Cundy's stove is far superior both in producing warmth over the whole room, and in promoting ventilation, without disagreeable currents of air, or close smell. MATTHEW O'BRIEN.

Letter from Professor Bradley.

King's College, London, July, 1846.

Sir,—I am happy to be able to bear testimony to the efficiency of your stove, which is fixed in my lecture-room at this institution. It seems to have all the essential requisites of a good stove, a rapid draught, freedom from all smoke, and from that smell which arises from iron, heated in contact with the air of a dwelling room; which is entirely avoided by your arrangement.

I am, Sir, your obedient servant, THOMAS BRADLEY.

From the Rev. Dr. Thompson, Incumbent of All Saints', St. John's Wood.

Gothic Villa, St. John's Wood, Oct. 23, 1846.

Sir,—Perhaps there are few private individuals who have had more experience in stoves than I have had; I have tried most of the newly invented ones, and rejected all but yours, two of which I have tried in my Temporary Church, and found them to succeed so well that I have introduced them into All Saints' Church, St. John's Wood. The following reasons induce me to approve of them:—Exemption of effluvia, the emission of a great body of pure warm air, the perfect system of ventilation, the sight of the fire, the consumption of vitiated air, the little attention requisite, the cleanliness connected with them, and though last not least, the great economy of fuel. All more I can say in favour of your stoves is, that wherever I require a stove, either for my house or church, I shall purchase your patent stoves, and recommend all my friends to do the same.—Yours truly, EDW. THOMPSON, D.D.

From the Rev. W. H. Impey, B.A., Incumbent of St. James, Norland.

St. James's, Norland, February 21st, 1846.

Sir,—I have much pleasure in certifying that since our stoves were rectified and completed, they have given in all respects the greatest satisfaction. By proper attention to doors and windows we can raise the temperature in very cold weather to 55 degrees, with one of your large stoves and two small ones, in our church, which contains about 130,000 cubic feet. The fires are very cheerful and agreeable in appearance, and the warmth occasioned by them is most pleasant and healthful.—I am, yours truly,

W. H. IMPEY.

From the Rev. J. D. Fraser, B.D., Minister of St. Paul's, Winchmore-hill.

Winchmore-hill, October 23rd, 1846.

Dear Sir,—After one winter's experience of your stove in St. Paul's Chapel, I feel no hesitation in saying that it may fairly claim a place in the first rank, among the inventions for warming churches. Before adopting your stove, I made extensive inquiries both as to the different kinds of stoves in use, and also as to the hot water system. Inconveniences of one kind or other I found practically experienced under the various systems with which I was unacquainted; but I really have not one inconvenience or objection to allege against your stove. I believe it to be more powerful than any other stove of the same dimensions and expense; and it is far more agreeable in a church than any other with which I am acquainted.—I remain, dear Sir, yours truly, J. D. FRASER.

P.S.—I should strongly recommend those who adopt your stove, to use the Derbyshire coal. The "Fresh Air Channel" with which your stove is supplied, serves a very useful purpose during the summer months in assisting the ventilation of the church, without occasioning any unpleasant draught.

From the Rev. A. Brandram, M.A., Rector of Beckenham, Kent.

Dear Sir,—I have much pleasure in stating to you that I consider your stove to have answered, and very satisfactorily too, every reasonable expectation; and I do not hesitate to recommend it strongly to the attention of those who are intending to introduce a warming apparatus into their churches, or other large buildings, for the first time, or who have reason to be dissatisfied with stoves hitherto employed.—I am, yours faithfully,

A. BRANDRAM.

From the Rev. Dr. Vivian, Minor Canon of St. Paul's, and Rector of St. Peter-le-Poer, Old Broad-street.

Sir,—I have no hesitation in bearing testimony to the excellency of your stove; in producing an equal degree of warmth over the whole of a large building, and in promoting ventilation, I consider them unrivalled. They are also the most economical I have ever met with. My church, which was notoriously one of the coldest in the metropolis, has, since the introduction of your stove (one of the largest size) about twelve months ago, become perfectly warm and comfortable.—I am, Sir, your faithful and much obliged servant, J. W. VIVIAN, D.D.

From the Venerable Archdeacon Sinclair.

Vicarage, Kensington, 1st Nov., 1846.

Dear Sir,—Having suffered much inconvenience on various occasions from hot water apparatus and other plans for heating large buildings, I had much satisfaction in hearing of your stove. I considered it to be constructed upon sound scientific principles, and having been informed of many cases in which it had been tried with success, I recommended it to the church-wardens of this parish. In Kensington Church you had great difficulty in obtaining a sufficient draft in the flues, but your stoves have been a great improvement upon the one previously in use; and I am confident that the alterations you now propose will give the church, in respect to warmth and ventilation, every advantage we can desire. Believe me to be, yours faithfully,

JOHN SINCLAIR.

PATENT TORRENT WATER-CLOSET.

AUSTIN'S PATENT.

This much approved and admired Closet is strongly recommended to those Architects and Builders who have not yet tried it; it is SELF-ACTING, THOROUGHLY CLEANSES the basin, is always TRAPPED, and requires no CISTERN if it can be connected with the water-main.

THE STOVES AND WATER-CLOSETS ARE MANUFACTURED ONLY BY MESSRS. DOWSON (LATE OF 69, WELBECK-STREET), STINGO IRON-WORKS, STINGO-LANE, LONDON.
